Drilling Commences – Mt Isa Region

Midas Resources Limited ("Midas") wishes to advise the commencement of a drill programme on the 5th of December 2013. This programme will comprise up to 2500m of Reverse Circulation drilling to test a number of high priority targets within the Mount Isa portfolio of tenements.

The first targets to be tested will include the Overlander North and Overlander South.

For more details on these and other high priority targets within the portfolio please refer to the ASX announcement titled "Proposed Exploration Strategy" dated 7/11/2013.

Regards
Alexander Hewlett

Executive Director.
